When All Else Fades,  
patchMap is Still There

patchMap creates a permanent record of the placement of patch test panels

- patchMap is designed to work with **broad or narrow backs** and with **multiple patch test panels**.
- patchMap is **simple to use**. Just peel off protective backing, place on back and record the position of patch test panels.
- patchMap is **convenient** to store. Fold in half and place in the patient's record.
- patchMap is **accurate** to align with orientation marks on skin or spine.
- patchMap is particularly useful for **later readings** (72-96 hours) when skin markings might have faded.

Part #ALA1700

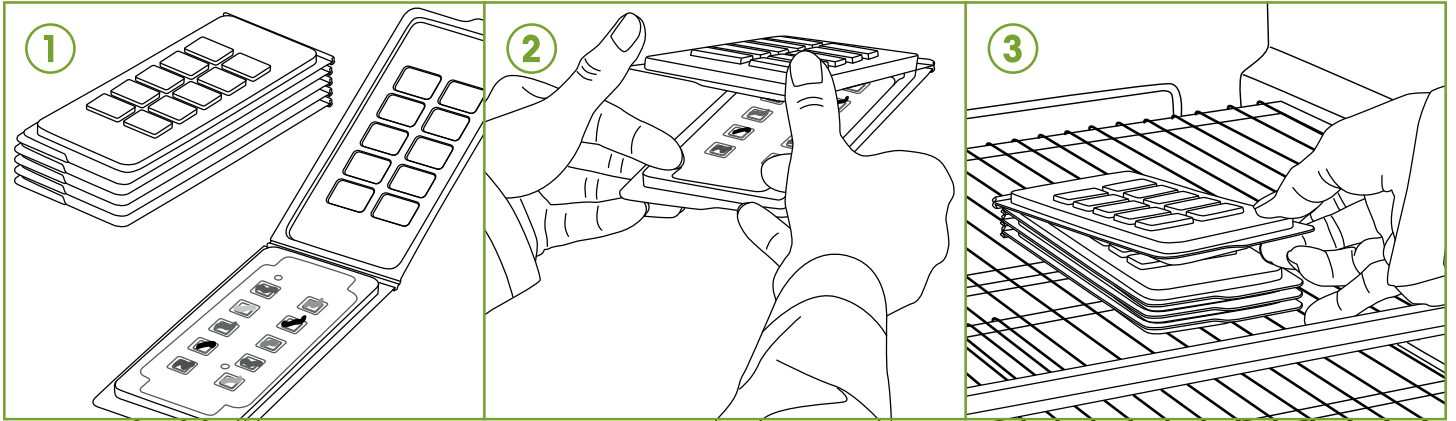

A Practical Solution for Patch Test Panel  
Storage and Transportation

## patchTransport protects and stores prepared patch test panels
